

COMP4513 JS3/Lab10 Instructions

Like the other labs in this course, the step-by-step lab instructions are in the gumroad lab package (<https://funwebdev3rd.gumroad.com/l/lab-set-one>).

While Lab10 was assigned in both COMP 3512/3612, less than a quarter of the students ended up completing it for marks. This lab covered content from 3512/3612 (array functions, fetch, localStorage), but it also covers content that we will cover at the beginning of 4513 (prototypes, classes, promises).

In terms of marking, I will be marking Project 1 at the end of Chapter 10. I have included the instructions for this project as well as the starting files, which can be found in the following github repo:

<https://github.com/mru-comp4513-archive/comp4513-w2023-js3>

While I don't mark your labs per se, I would **STRONGLY** recommend you do the step-by-step exercises in the labs in this course before attempting the projects.

Since there are no scheduled labs in this class, you will have to show me your work on your laptop in my office (or after class on Fridays) the week of January 16-20.
